

KICKSTART SCHEME

Do you run a Kickstart programme in your business?

As the employer of someone on a Kickstart programme it is your responsibility to provide wrap-around support, including employability skills, for that individual.

At HIT Training Ltd, we understand that many employers don't have the resources to provide the employability skills that are mandated by the programme, so we have designed a course to provide your candidates with the essential employability skills required as part of your Kickstart programme including CV writing and interview skills, alongside lifeskills, such as team work, organisation, communications and customer care.

For a fee of £500 per Kickstart candidate we will enrol them onto our Kickstart pre-employment programme. The two week training programme will equip each candidate with the following skills needed to help them find sustained employment:

- ▶ Improving own confidence
- ▶ Introduction to Customer Care
- ▶ Managing personal finance
- ▶ Communication with others at work
- ▶ Preparing for interviews.

Please note we run our Kickstart employability programmes with cohorts of twelve so register your interest as soon as you take on your Kickstarter and they will soon be on the course!
